

# CHIDUBE RHEMA

## Frontend Developer

07088309075 · rhemathechidube@gmail.com · Ojota, Lagos

---

### PROFILE

Frontend developer with 3+ years of experience building dashboards, admin panels, and landing pages for real clients, mostly with React, Next.js, and Tailwind CSS. I'm used to taking someone else's design and building it exactly as intended, right down to the spacing and small transitions. I've connected interfaces to REST APIs for payments, SMS, and tracking, and I've built data visualizations with Recharts. I also use AI tools daily to move faster through the repetitive parts of a build, so I can spend more time on the parts that actually need my judgment.

---

### TECHNICAL SKILLS

- Frontend: React.js, Next.js, JavaScript (ES6+), Redux, TypeScript (working knowledge)
- Styling & UI: Tailwind CSS, CSS-in-JS, CSS3, HTML5, Responsive & mobile-first design, Web performance optimisation
- Data & Visualization: Recharts, REST API integration, handling loading/error states, real-time data flows
- Animation: Framer Motion, GSAP, micro-interactions & transitions
- AI Tools: Comfortable using Claude and ChatGPT daily to speed up scaffolding and debugging without cutting corners on quality
- Workflow: Git & version control, code debugging, cross-functional collaboration with designers, backend engineers, and product teams

---

### PROFESSIONAL EXPERIENCE

#### Frontend Developer

Oct 2022 – Present

*LightupLink*

- Built interactive features for production using React, turning design files into interfaces that matched them closely, down to spacing and small details.
- Added animations and transitions with Framer Motion to make the product feel more polished to use.
- Improved site performance through code splitting, lazy loading, and image compression.

#### Frontend Developer

Oct 2023 – Present

*ExoDigital*

- Built landing pages and client demos for a fast-paced digital marketing agency, turning campaign and brand goals into fast, good-looking pages.
- Integrated Meta Pixel so the frontend could feed live marketing data back to the team, and tracked down issues when events fired incorrectly.
- Built responsive layouts with React, Framer Motion, and Tailwind CSS that worked well across devices.

#### Junior Frontend Developer

Oct 2024 – Dec 2024

*COSUB*

- Built CoSub's marketing landing page and a dashboard for managing shared subscription plans, using Next.js and React.
- Built usage and cost breakdown charts with Recharts so users could see their subscription data at a glance.
- Worked closely with product and design to keep the subscription sharing and cost tracking experience simple to use.

#### Frontend Developer

Dec 2024 – Jan 2025

*Folitracks*

- Built the marketing landing page and both the admin and customer-facing dashboards for a vehicle service platform that used QR codes.

- Built interfaces for managing vehicle service records, repair tracking, and QR-linked service history.
- Built the interactive UI with React and Tailwind CSS, keeping navigation simple across both dashboards.

## SELECTED PROJECTS

---

- Automated SMS Reminder System (Church Ops): Built a scheduled reminder tool with a React and Vite frontend, GitHub Actions for automation, and the Termii API for SMS delivery, all driven by one config file as the single source of truth.
- EXODIGITAL Storefront: Built a full e-commerce storefront with React, Vite, and Tailwind CSS. Integrated Paystack for live payments and Meta Pixel for conversion tracking, and kept closely to a dark, editorial brand identity throughout.
- Personal Portfolio: Designed and built a custom portfolio site in React and Tailwind CSS, with custom animated skill components and its own visual identity, shipped as a production Vite build.

## EDUCATION

---

### **HND – Electrical and Electronics Engineering**

Yaba College of Technology, Lagos · Second Class
